

Studies on the Medicinal Plants of Tughlaqabad in South Delhi

Javed Ahmad ¹ and R. U. Ahmad ²

Received on November 2th, 1976

The Paper presents eco-taxonomical details of the medicinal plants of Tughlaqabad. The dominant and commonest species are given. Ninety-six species, mostly of commercial importance, belonging to seventy-one general and forty-one families have been included with their local names. Some of the controversial drugs have also been discussed.
