

Preliminary Observations on Medicinal Plants of Lahaul Spiti Forest Division in Himachal Pradesh

M. R. Uniyal¹, A. V. Bhat² and P. N. Chaturvedi³

Received on October 17th, 1973.

The present work deals with the medicinal plants collected from Lahaul Spiti forest division during the survey tours in the month of July and September, 1972. In all, sixty nine medicinal plants belonging to twenty seven families, along with their local and Sanskrit names, short descriptions, folklore claims and their extent of trade for commercially important plants are enumerated here.
