

Weeds Associated with Saffron Farming at Ranikhet Hills (U.P.)

G.C. Joshi¹, P.B. Kabdal², K.C. Tiwari³ and R.K. Issar⁴

Received on 8th Dec., 1988

*A systematic survey of weeds associated with saffron (*Crocus sativus* Linn.) Farming at Saffron Research Farm Ranikhet has been made. A total 164 species belonging to 39 families have been collected. The habit, habitat, distribution and phenology have also been recorded and described in the paper.*
