

Identification of the Leaf and Pericarp of the Fruit of *Punica granatum* Linn. used in the Indian System of Medicine

Dipali Dey¹ and M.N. Das²

Received on 23rd Dec., 1988

Morphology, microscopical characters and their quantitative data, cell contents, powdered drugs, physical content values including dry matter, ash and extractive values and fluorescence characters of authentic samples of Punica granatum leaf and pericarp have been studied for identification of the commercial samples used in the Indian system of medicine.
