

'Shinshapa' with a Brief Observation on Yellow Rust Attack at Ranikhet

V.N. Pandey¹, K.C. Tiwari² and M.R. Uniyal³

Received on 20th Oct., 1989

Yellow Rust attack on the different parts of the tree Shinshapa (Dalbergia sissoo Roxb.) has been observed. It is suggested to control the disease in the natural forest and during new plantation so that potential loss to the health of this medicinally economically important tree may be checked.
