

Ethno-Medicinal Plants of Mandi-District, Himachal Pradesh

R.D. Gaur¹ and P.B. Singh²

Received on 10th December, 1992

The present communication pertains to the ethnomedicinal plants of Mandi-district of Himachal Pradesh in North-West Himalaya. An extensive field study in the remote localities of the district was carried out and information on the folk utilization of medicinal plants was gathered from the rural inhabitants. In the present study as many as 60 plant species are reported as important ethnomedicines from Himachal Pradesh.
