

## Medico-Botanical Survey Studies in Karnataka

S.N. Yoganasimhan<sup>1</sup>

Received on 4th April, 1993

*The various medico-botanical survey studies carried out in Karnataka are discussed. The importance of such studies in the identification of raw or crude drugs, establishing new or alternate sources, identification of hitherto unknown Ayurvedic and Siddha drugs and techno-economic data are highlighted. Its role in cultivation and conservation of medicinal plants, socio-economic programmes, education and industry are also discussed.*

Jayanagar, Bangalore-11.
