

Evaluation of Therapeutic Status of Madhya Pradesh Flora

O.P. Mishra¹

Received on 4th June, 1993

Importance of flora of a certain area lies basically in its economic and therapeutic value. With this view point Himalaya is taken to be treasure of herbal wealth on account of availability of miraculous and some very valuable drug species. The state of Madhya Pradesh by virtue of its geographical situation attains a distinct status in acquiring considerable number of therapeutic species. The numerical status of therapeutic species of Madhya Pradesh far exceeds, the other areas and even the Himalayas. The present article deal with the evaluation of therapeutic species from different pathies such as Ayurveda, Allopathy, Unani and Homoeopathy. The Ayurvedic evaluation has been done in detail. With the help of number of therapeutic species it has been tried to establish the therapeutic status of Madhya Pradesh flora.
