

Survey of Medicinal Plants in Assam

Sachchida Nand¹

Received on 6th June, 1992

Survey of medicinal plants in Assam state embodies a list of medicinal plants available in Assam with its Botanical name, Sanskrit name, parts used in the medicine, time of flowering and fruiting, the prospect of cultivation and preservation of extincting medicinal plants. The total medicinal plants are more than 200 but most of them also grow in other part of India. Therefore only 53 important plants which abundantly grow in Assam have been studied. About 25 medicinal plants which are very important and useful to mankind are facing danger of their existence are also enlisted in this paper.
