

## **SOME FOLK LORE MEDICINAL CLAIMS ON PLANTS OF CAR NICOBAR ISLAND**

**H.S. Dagar<sup>1</sup> and J.C. Dagar<sup>2</sup>**

**Received on 15.9.1989**

*During the ethnobotanical studies on Nicobar group of Islands it is found that some plants occur on both mainland India and Andaman-Nicobar Island but their folk-lore claims in medicines or their methods of use are different among the Nicobarese aborigines and do not seem to be recorded so far in the literature. Folk-lore claims of 44 such plant species (under 41 genera of 29 families) found in Car Nicobar are described here.*
