

STUDIES ON THE STANDARDISATION OF SOME SIDDHA MEDICINES USED IN LEUCODERMA

A. Saraswathy, S. Joy, M. Girija Rani and P. Brindha

(Received on 26-7-2000)

Parankippataic curanam and Ayac centuram are used in the treatment of leucoderma. In order to lay down standards, Parankippataic curanam was prepared in lab scale (authentic) and was compared with 4 samples procured from the local market. The parameters compared were physico-chemical data, microscopic studies, and HPTLC. Ayac centuram was also prepared and chemically analysed.
