## BIOEFFICACY OF THE ROOTS OF DELPHINIUM DENUDATUM (DD) WALL, AGAINST CURVULARIA LUNATA

G. Vijaiyan Siva, S. Sudha Revathy and U. Md. Kaiser Rabee

The present work was aimed to determine the bioefficacy of aqueous and ethanolic extracts of the roots of Delphinium denudatum against a pathogenic fungus, Curvularia lunata.

Aqueous and ethanolic extracts were obtained by standard methods and various concentrations were tested against the pathogenic fungi by disc diffusion method. The crude samples were further screened using thin layer chromatographic method and confirmed by Spectroscopic analysis.

Both aqueous and ethanolic extracts significantly inhibited the growth of Curvularia lunata.
