

Terpenoids of *Streblus asper* Lour. (Moraceae)

B.R. Barik, A.K. Dey and P.C. Das

Received on December 14th, 1980

Chemical examination of stem and root of Streblus asper Lour. resulted in the isolation and characterisation of three triterpenoids while some other triterpenoids have already been reported. An improved method which was developed at the Department of Pure Chemistry, University College of Science, Calcutta, was applied for such study.
