

Background

World Patient Safety Day (WPSD), observed annually on 17th September, aims to raise global awareness about patient safety and call for solidarity and united action by all countries and international partners to reduce patient harm.

Considering the growing use of ASU & H products and medicines globally; inclusion of traditional medicines in Pharmacovigilance systems became equally important.

CCRAS-Central Ayurveda Research Institute (CARI), New Delhi, along with Peripheral Pharmacovigilance Centre (PPvC) and National Pharmacovigilance Co-ordination Centre (NPvCC) is organizing a two-day **National Seminar on "Fostering Patient Safety: Role of Diagnostic Practice in Ayush"** to explore the integrated wisdom of Ayush systems & modern sciences on the diagnosis, treatment, and safety aspects.

This two-day National Seminar with the theme "Samyak Pariksha: Atura Suraksha" intends to create awareness among the Ayush fraternity about Pharmacovigilance thereby adding value to achieve "Patient Safety" aligning with this years WHO theme i.e., "Improving diagnosis for patient safety."
